

# HOPASCOPO TECHNOLOGIES

*Innovative Maintenance Solution*

When Passion works against you, it is intoxicating. It is an unconscious expression of the doing what one likes. I had it in me to fix things.

**HOPASCOPO TECHNOLOGIES** what is today is from this very seed, passion - Make things right.

The idea started off in 2016. We have been ideating ever since.

Hands On!

# ABOUT US “

Hopascopo Technologies have been in operation since 2016. During these years, we became specialized in Erection, Installation, Services, maintenance, restoration & retrofit of heavy machinery equipment

Hopascopo Technologies is a company built from a vast array of industrial maintenance service experience. We can provide full service and maintenance programs tailored to your requirements

With necessary procedures in place our maintenance practice provides bespoke service to the highest level and to the complete satisfaction of our clients.

Our consistency of work, quality, reliable and fast action along with our team of experienced electromechanical engineers have contributed towards the success to date

**Repair & Maintenance**

**Overhauling, Retrofit, Installation & Erection.**

**Reverse Engineering**

**Machine Spare parts**

**Automation**

**Jigs & Fixtures**

**Project consultancy– Engineered Quartz & SPC Flooring including installation & commissioning of Plants**

**WHAT WE  
DO**

### **Repair & Maintenance**

No matter which Industry you are in with our experienced team of engineers and technicians, we fix your assets and minimise expensive downtime in situations that are beyond the scope of in-house technicians.

Any brand any make: We have the resources to address any electrical, software or mechanical related issues on any model or make of the Natural stone processing or engineered quartz machines

### **Overhauling, Reconditioning, Retrofit, Installation & Erection, (Any brand, any make)**

Has your granite/Marble processing machine seen a long & very intense life? We offer sub – assembly & overhaul service at your site. Machines being very large and heavy in size, we can either offer an overhaul of the machine or in case of machines which are decades old, we can re-build & restore it to the original condition with very less investment.

### Reverse Engineering

Sometimes importing mechanical spares could be very expensive & time consuming or it may not be produced anymore or even damaged/broken.

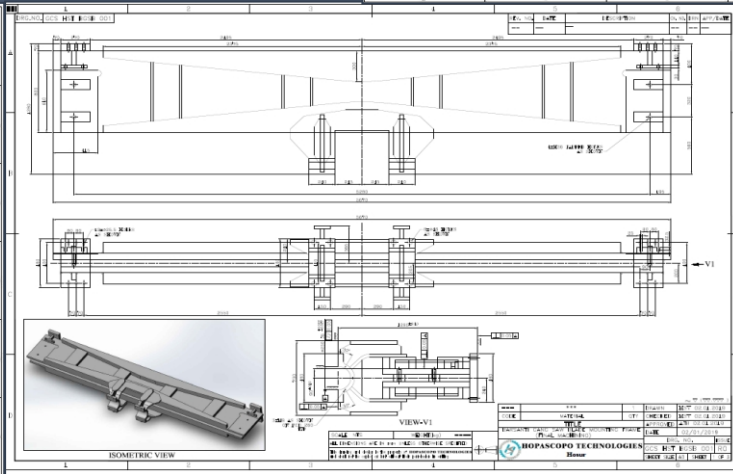

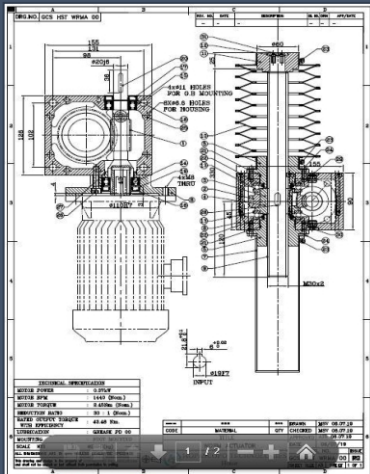

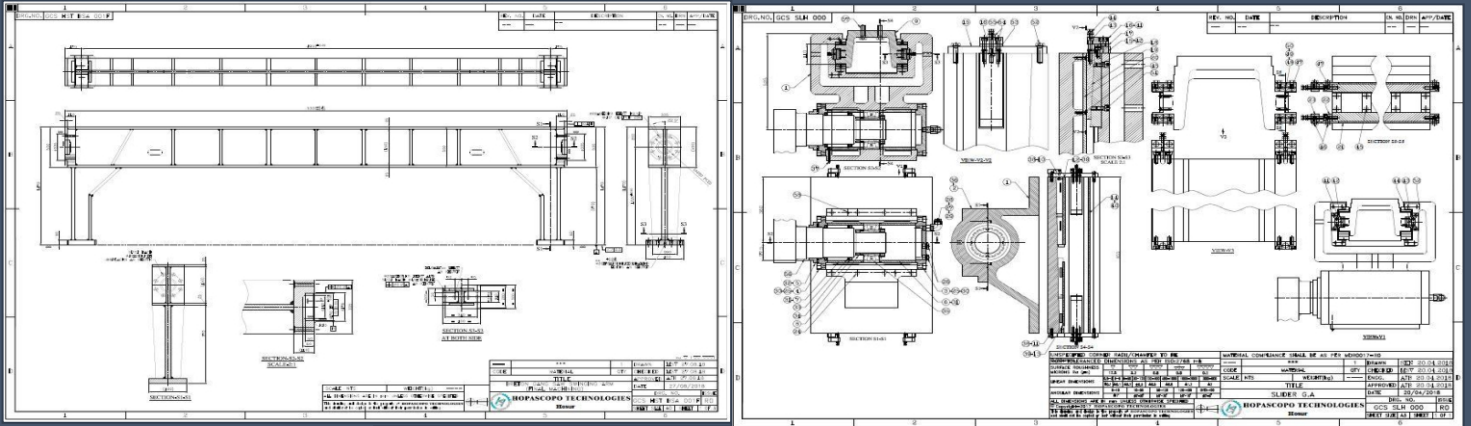

We duplicate the same by reverse Engineering. Be it structural or mechanical components, Hopascopo is always ready to take up this challenge.

### Spare Parts

Custom machine parts offered by us are appreciated by our clients for its robust construction with no compromise on quality. Gearboxes, to fabricated parts, machined parts to casting, we have you covered.

### Jigs & Fixtures

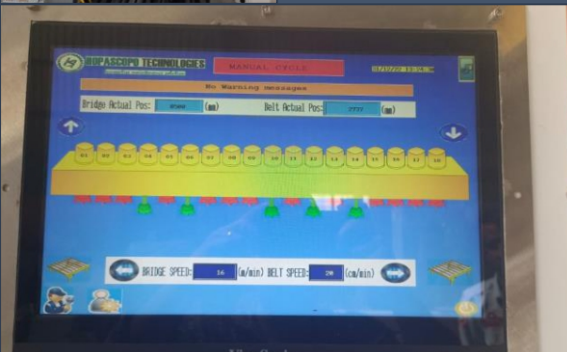

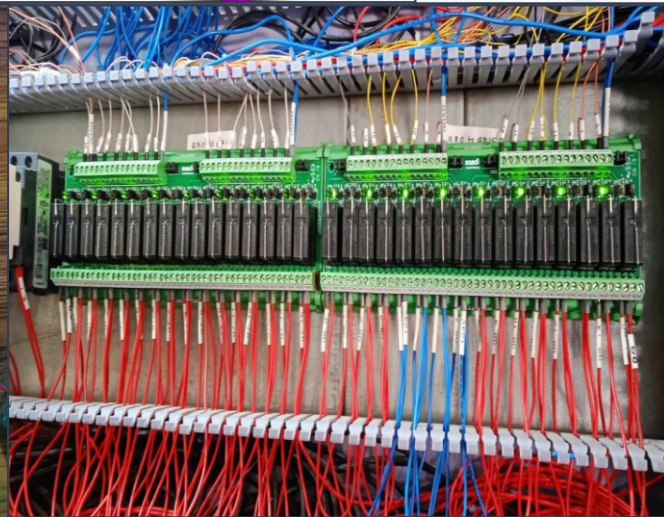

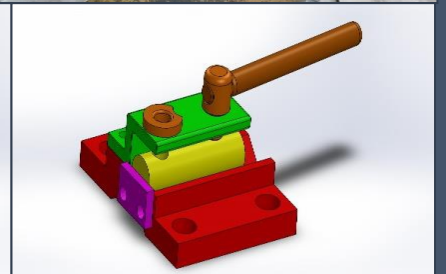

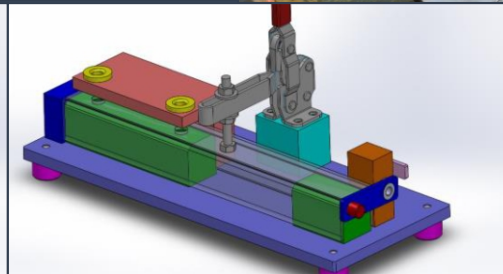

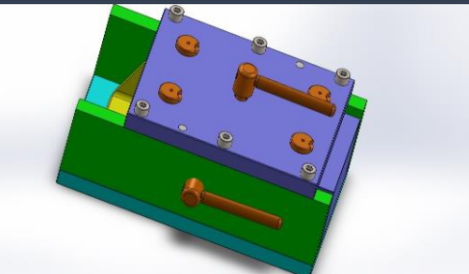

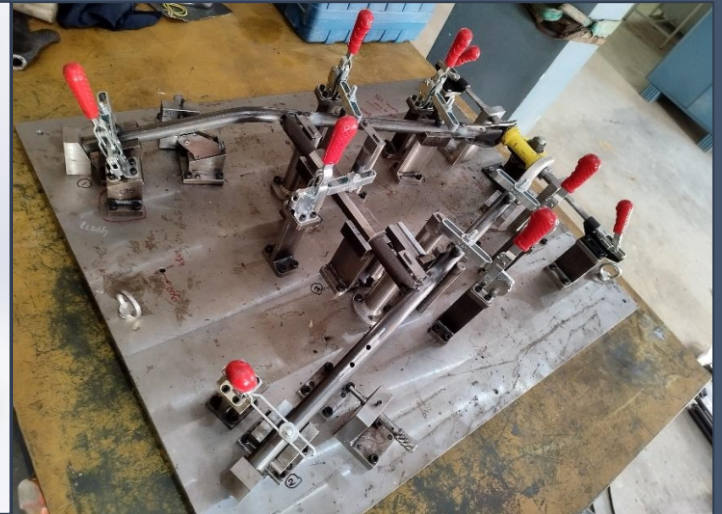

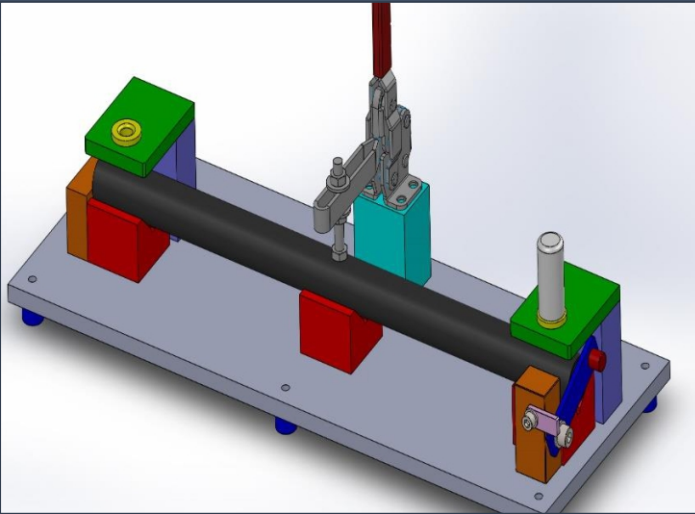

Jigs & Fixtures are special purpose equipment used to facilitate production (machining, assembling & inspection operations). Today our fixturing includes several systems which enables clients with ease to meet the demands of the modern metalworking, plastics and electronics industries.

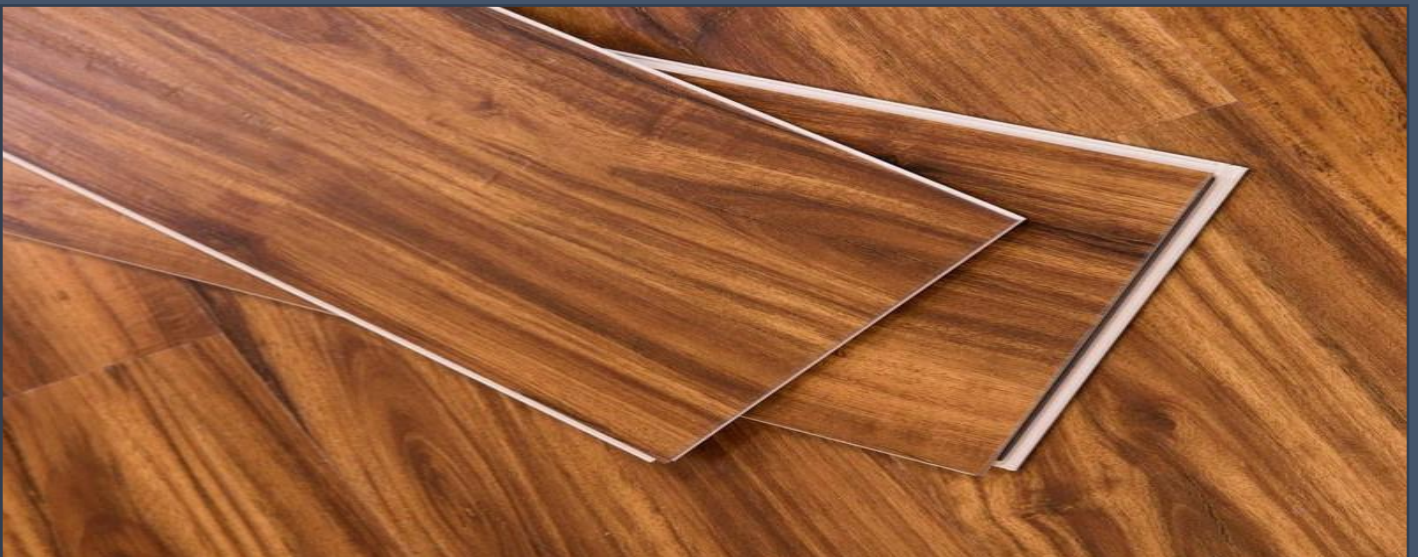

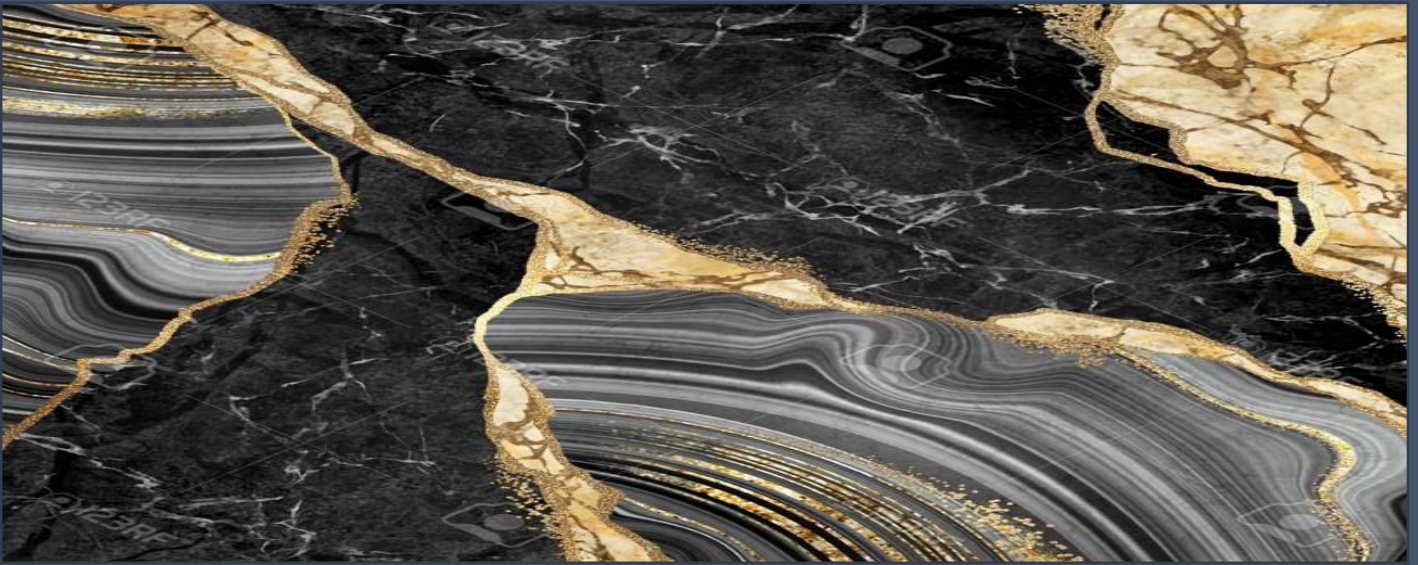

### Automation

At HOPASCOPO, we love automation and drive the digital transformation with customised requirements for our clients. We ensure seamless interaction of all components while thinking and acting in open environments of technology and ideas while we bring more flexibility, productivity to make new things a standard.

### Project Consultancy

Turnkey project consultation for Granite, Engineered Stone & SPC – Full service process involving project & financial analysis, plant design, machinery selection, installation & commissioning, training. We are your source for a successful & professional turnkey solution.
